

IP FABRIC

IP Fabric | Partner Program

IP Fabric is an Automated Network Assurance Platform revolutionizing how organizations manage increasingly complex networks by providing deep insight into network behaviour.

At IP Fabric we recognize the value of our technology not just as a tool for your customers to revolutionize how they understand their networks, but also as a means for you to provide high-value Managed and Consulting Services.

Challenge

One of the greatest challenges for any IT organization is understanding their network topology. Most still rely on manual documentation and diagrams from when the network was first built. Unsurprisingly, this can cause serious issues with troubleshooting, change control and planning for future developments.

As a partner and trusted advisor, your customers rely on you to deliver products and services to enhance their networks and security against this challenging background, often resulting in the need for costly manual processes just to understand what already exists..

Solution

Incorporating IP Fabric's Automated Network Assurance into your portfolio allows you to take an accurate snapshot of your customer's complete network (LAN, WAN, Datacentre and Cloud), providing in-depth details of every device, configuration, and relationship at layer 1, layer 2 and layer 3 - reducing a process that once took days to a matter of minutes. This allows you to not only accurately map your customers network but track the effect of changes over time quickly and easily. IP Fabric also plays a vital role in troubleshooting network and connectivity issues.

Benefits

The IP Fabric Partner Program encompasses Resell, Managed Service and Consultancy business models, allowing you to deliver the benefits of IP Fabric in the ways most suited to your business. However you provide our technology and your services, you will benefit from the full support of IP Fabric:

- Sales Support and Training
- Marketing Support
- Presales Support and Training
- Lab/ Demo Licenses
- Technical support and Training
- Support from our dedicated Partnering Team

About IP Fabric

IP Fabric is a vendor-neutral network assurance platform that automates the holistic discovery, verification, visualization, and documentation of large-scale enterprise networks, reducing the associated costs and required resources whilst improving security and efficiency.

It supports your engineering and operations teams, underpinning migration and transformation projects. IP Fabric will revolutionize how you approach network visibility and assurance, security assurance, automation, multi-cloud networking, and trouble resolution.

Don't take our word for it

See how assurance can transform your approach to network management.
